1. About the store

Java Pet Store Lite is an online pet catalog. You can browse pets by category, search the catalog, create an account, sign in and review your recent sign-in activity. The store has three functions:

Function	What you can do	Sign-in needed
Catalog browsing and search	Browse categories, products and items. Search by keyword.	No
Sign-on and account	Create an account, sign in, view your account and sign-in history, sign out.	For My Account
Sample data	The catalog is loaded automatically the first time the store is opened.	No

The store is in English (en_US) and shows prices in US dollars.

Java™ Pet Store Lite

User Guide for Customers

Document	PSL-UG-01
Version	1.3.2-lite-1
Audience	Store customers
Application	Petstore Lite web store, `http://<server>:8080/petstore/`
Related	PSL-AG-01 Administrator Guide, PSL-RB-01 Operations Runbook

1.1 Page layout

Every page has the same four parts:

- **Banner** at the top: the Java Pet Store logo (returns to the home page), the **Search** box, and the links **Account** and **Sign in** (or **Sign out** when you are signed in). When you are signed in the banner shows *Signed in as <user name>*.
- **Pets** side bar on the left: one link per category, in alphabetical order.
- **Body** in the middle: the page you asked for.
- **Footer** at the bottom.

2. Entering the store

1. Open `http://<server>:8080/petstore/`. The entry page appears.
2. Click **enter the store**. If this is the first visit after installation, the store loads its catalog first. A red message *Please wait while the Java Pet Store Application is being populated...* shows while it loads.
3. The home page opens with a picture of the pets. Click a pet in the picture, or a category in the side bar.

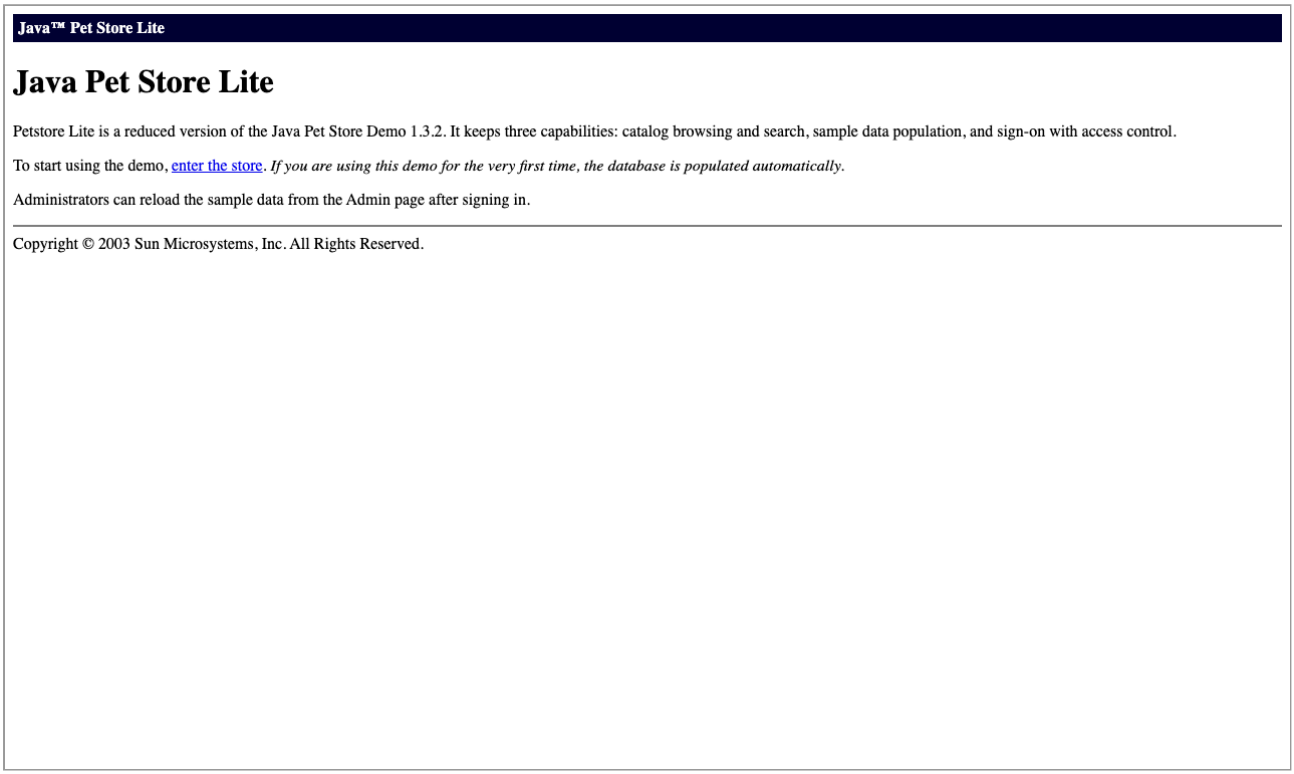

Figure 1. Store entry page (index.jsp)

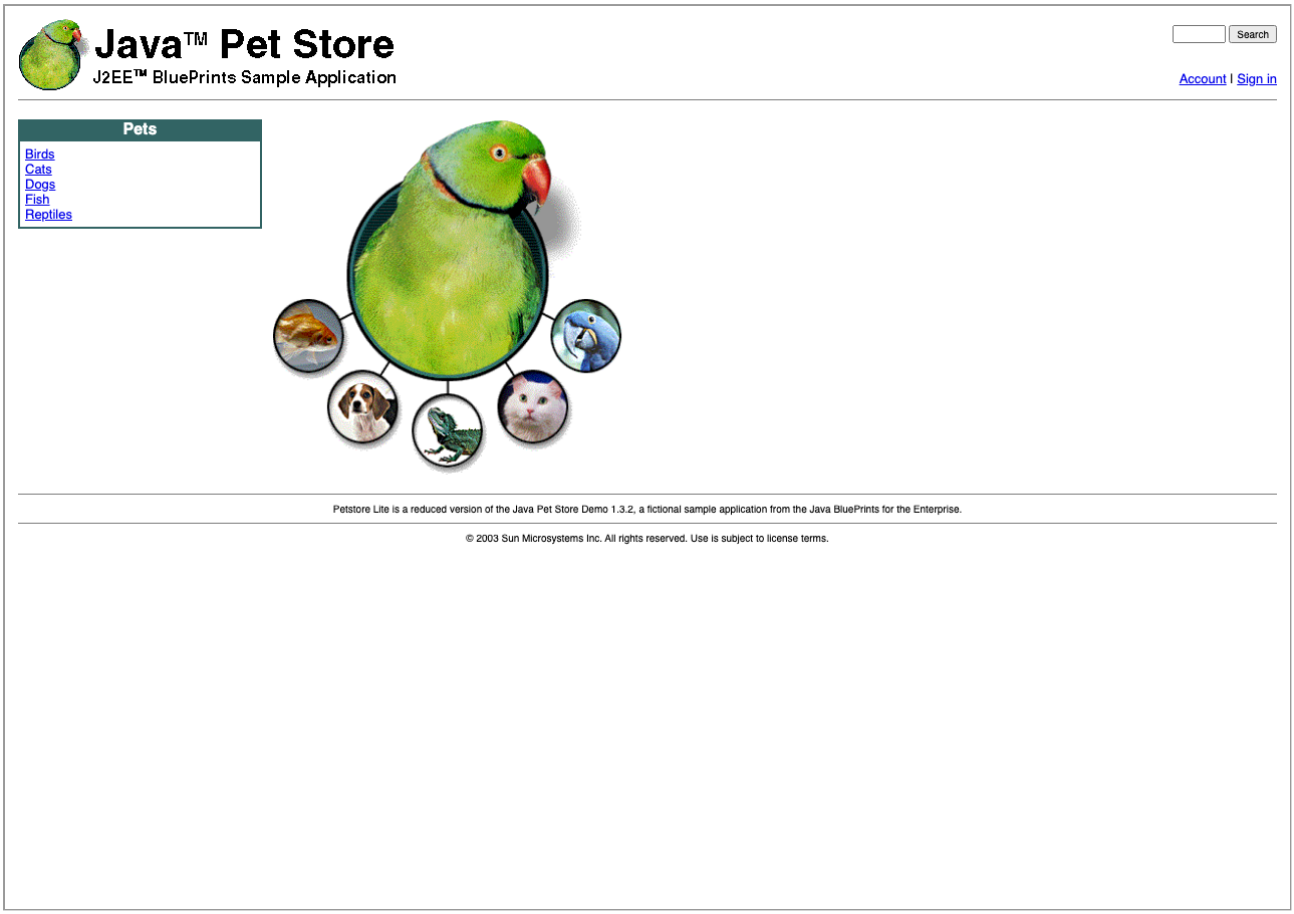

Figure 2. Home page (main.screen)

3. Browsing the catalog

The catalog has three levels:

Level	Example	Page
Category	Dogs	Lists the products in the category
Product	Bulldog (K9-BD-01)	Lists the items of the product with their list price
Item	Male Adult Bulldog (EST-6)	Shows the picture, List Price, Your Price, description and Item ID

The store has five categories: Birds, Cats, Dogs, Fish and Reptiles.

3.1 Browse a category

1. Click a category in the **Pets** side bar, for example **Dogs**.
2. The page *Products for this Category* lists two products at a time, each with its name and description.
3. Click **Next** to see the next two products, or **Previous** to go back. A link only appears when there is a page in that direction.

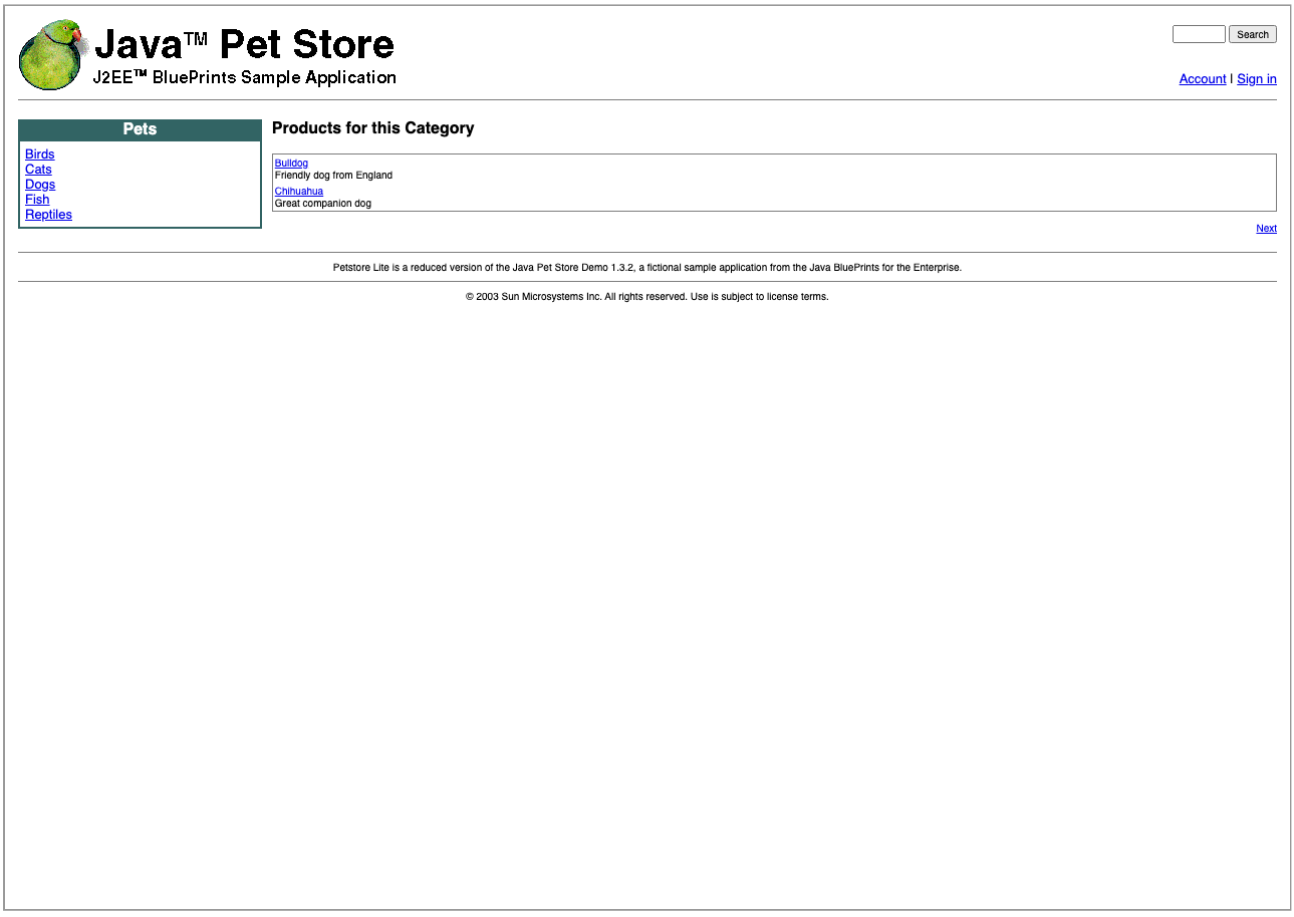

Figure 3. Products in the Dogs category, first page

3.2 View the items of a product

1. Click a product name, for example **Bulldog**.
2. The page *Items for this Product* lists the items, two at a time, with the item attribute, name, description and list price.

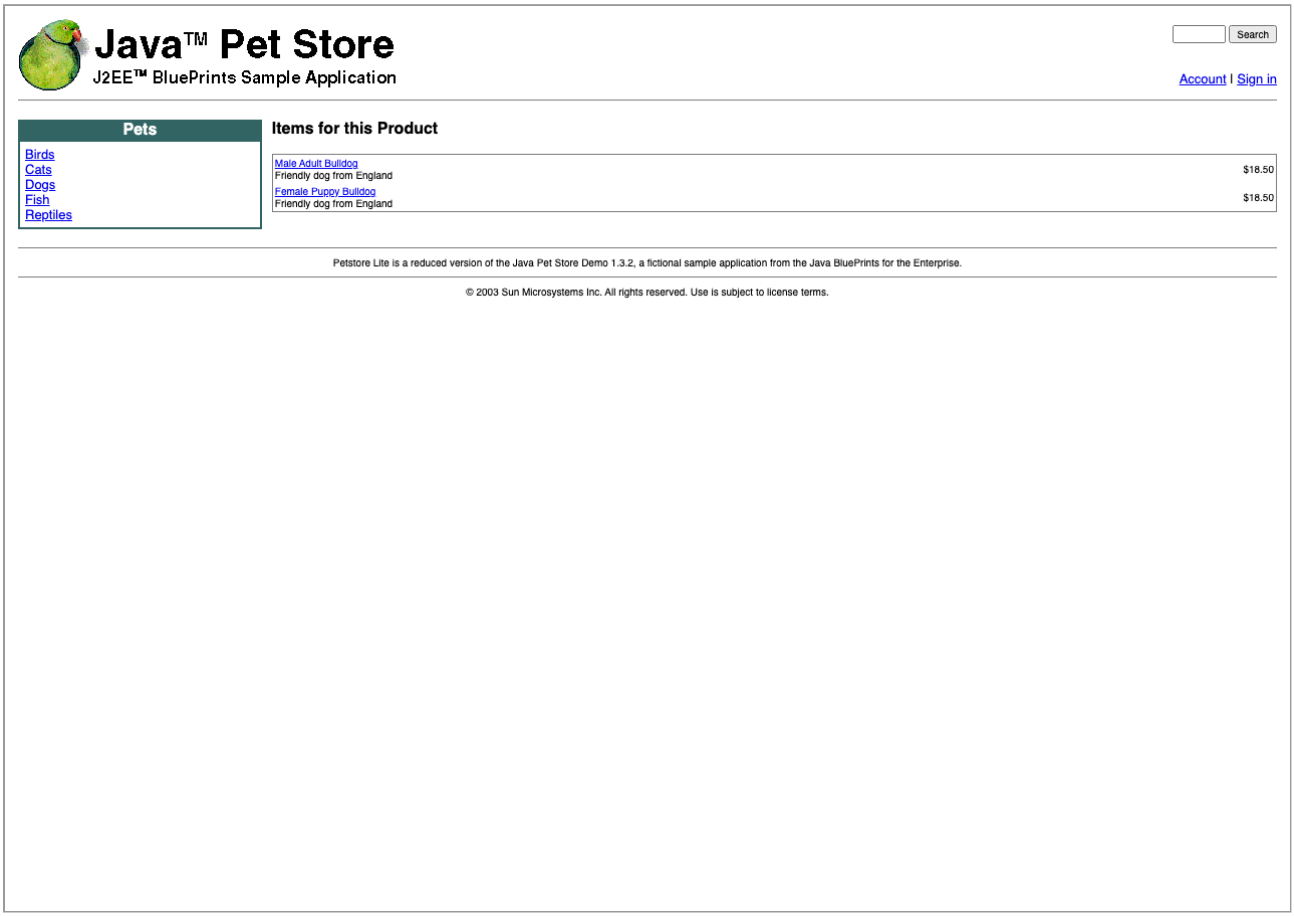

Figure 4. Items of the Bulldog product

3.3 View an item

Click an item. The item page shows:

- **List Price**: the catalog price.
- **Your Price**: the discounted price for members.
- The description and the **Item ID** (for example EST-6). Quote the Item ID when you contact the store.

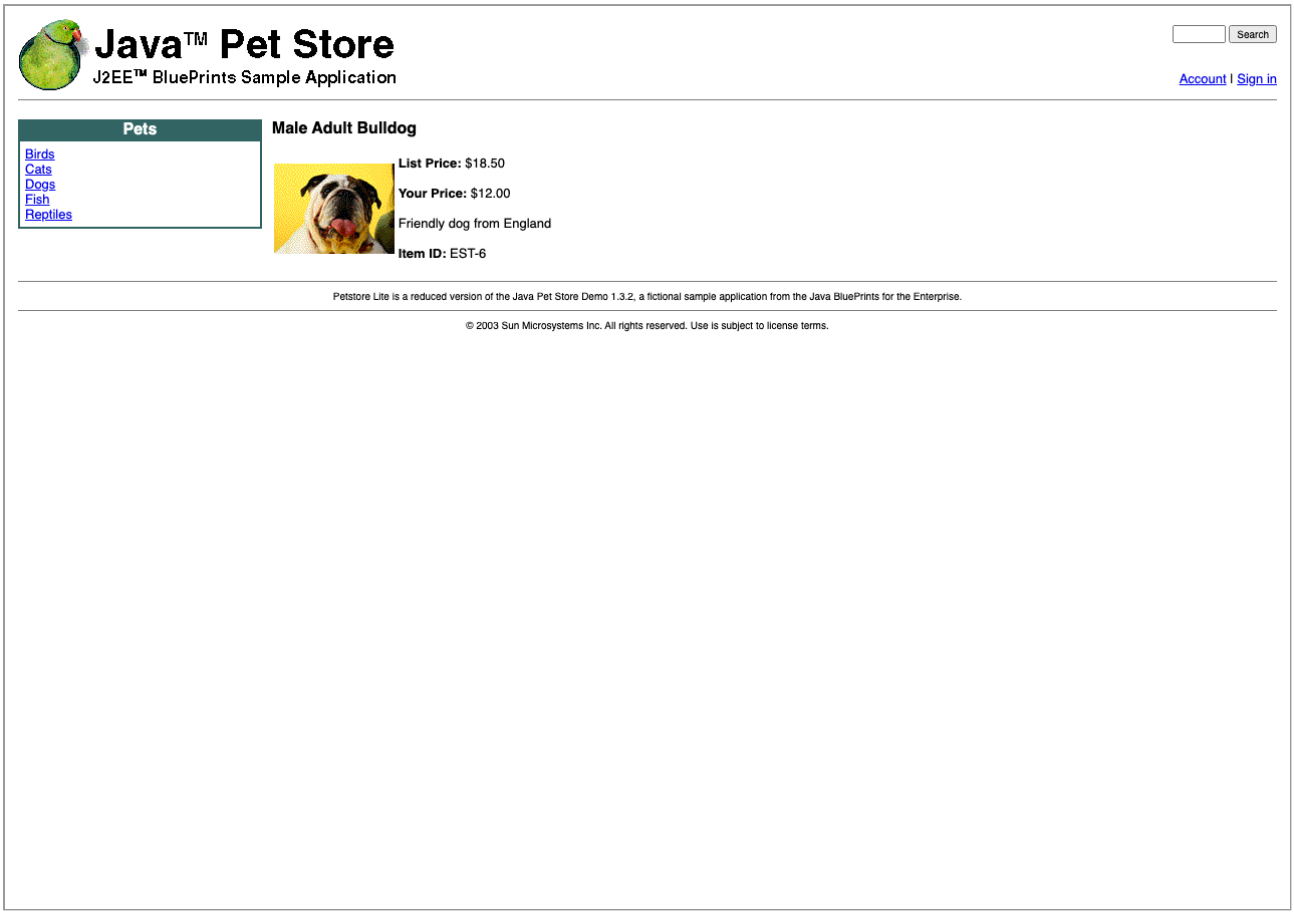

Figure 5. Item page for EST-6 Male Adult Bulldog

4. Searching

1. Type one or more words in the **Search** box in the banner and click **Search**.
2. The page *Search Results* lists the matching items, two at a time, with **Next** and **Previous** links.
3. Click an item to open its item page.

How search matches:

- A word matches when it appears anywhere in the product name, the category code (for example DOGS) or the item description. Part of a word is enough: *dog* finds Bulldog and every item in the DOGS category.
- When you type several words separated by spaces, items that match **any** of the words are listed.
- Search is not case-sensitive.
- If nothing matches, or the box is empty, the page shows *No results were found for your search.*

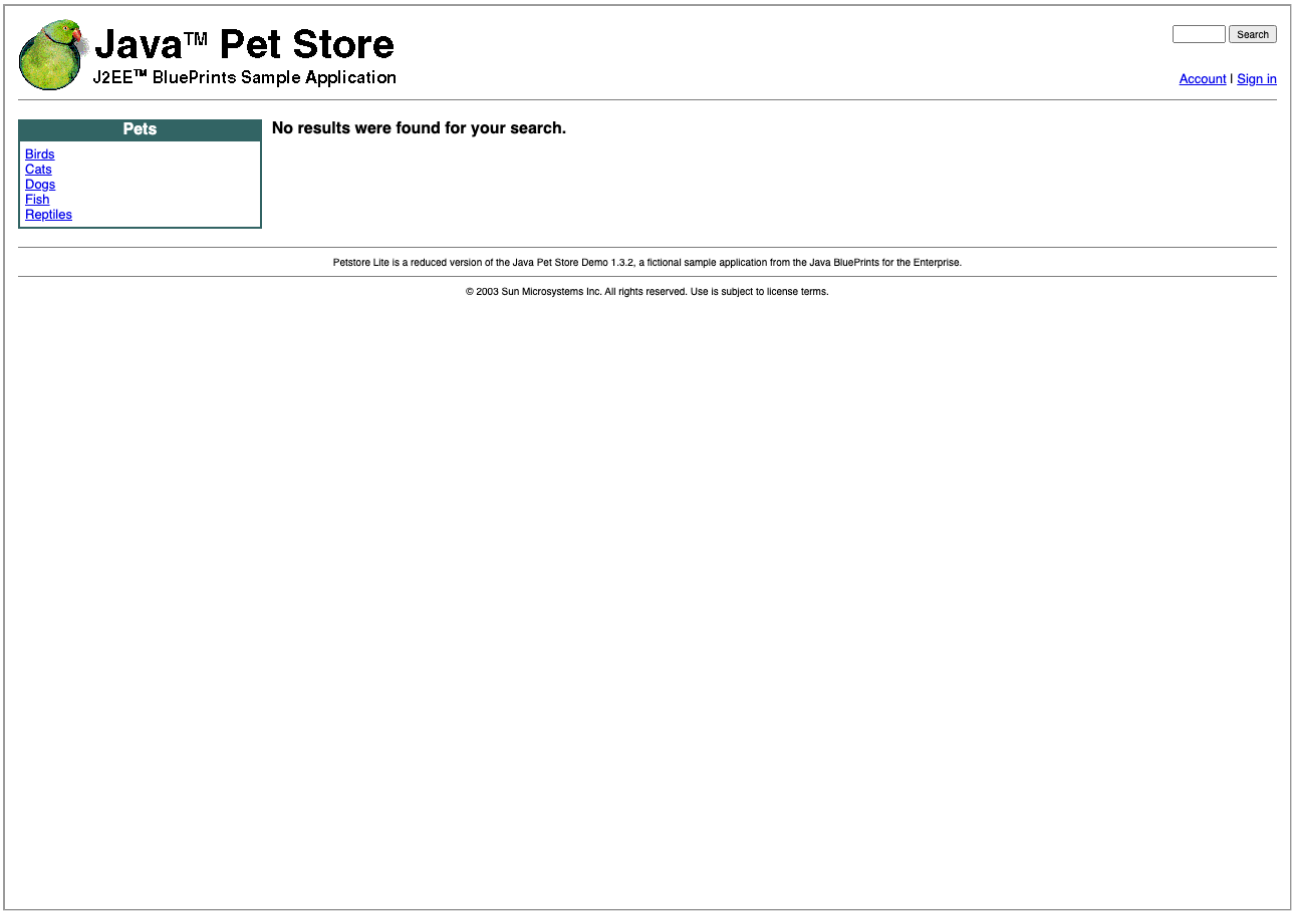

Figure 7. A search with no results

5. Your account

5.1 Create an account

1. Click **Sign in** in the banner, or click **Account**. The *Sign In* page appears.
2. In the right-hand box *No. I would like to sign up for an account*, enter a **User Name**, a **Password** and the password again in **Password (Repeat)**.
3. Click **Create New Account**. You are signed in at once and taken to the page you asked for, or to the home page.

Field	Rule	Message when the rule is broken
User Name	3 to 25 characters	The user name must be 3 to 25 characters.
User Name	Letters, digits, '-' and '_' only	The user name can only contain letters, digits, '-' and '_'.
User Name	Must not already exist	The user name <name> is already taken. Choose another user name.
Password	4 to 25 characters	The password must be 4 to 25 characters.
Password (Repeat)	Must equal Password	The password and the confirmation do not match.

User names are case-sensitive: *J2EE* and *j2ee* are different users. New accounts are customer accounts.

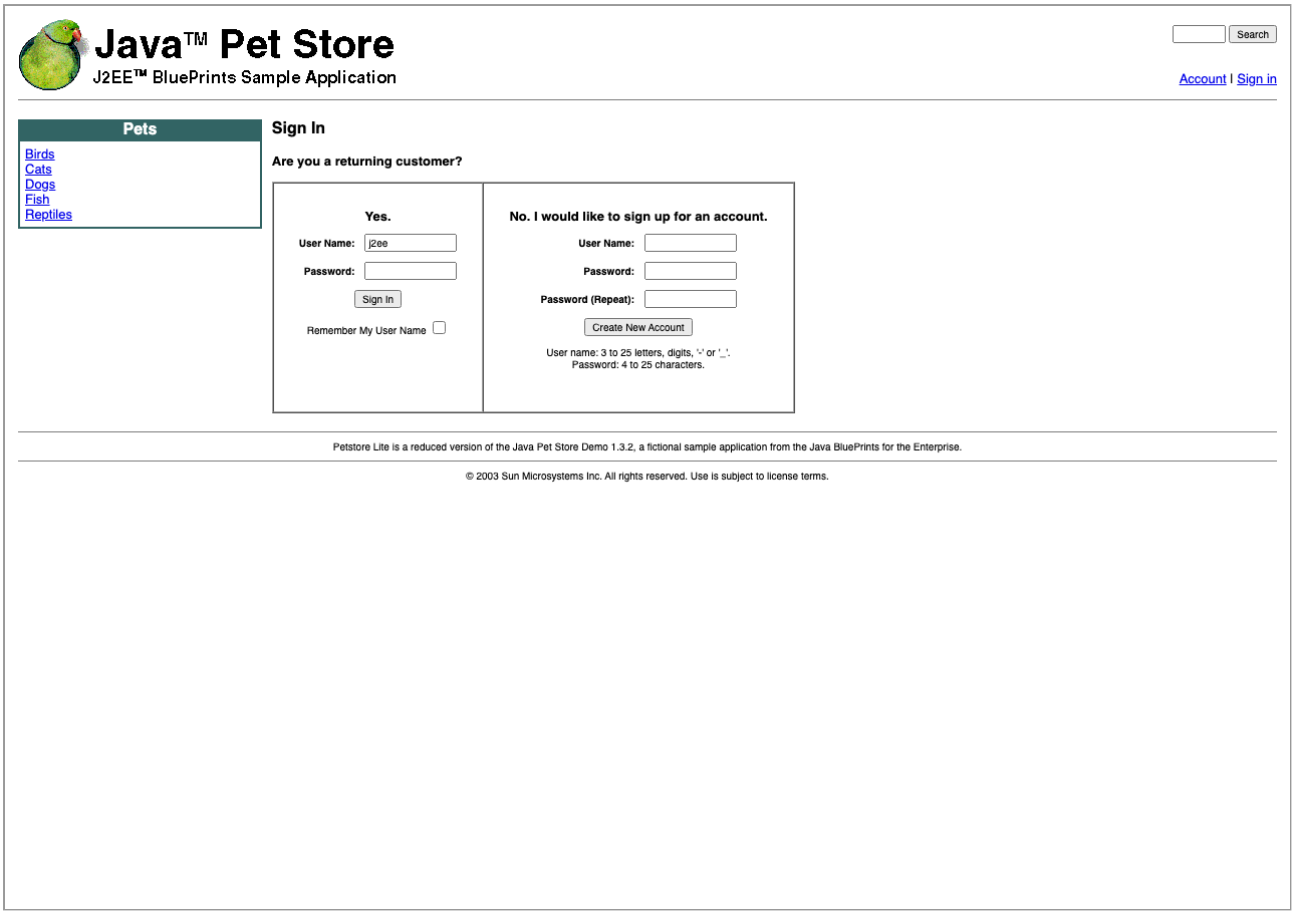

Figure 8. Sign In page with the sign-in and sign-up forms

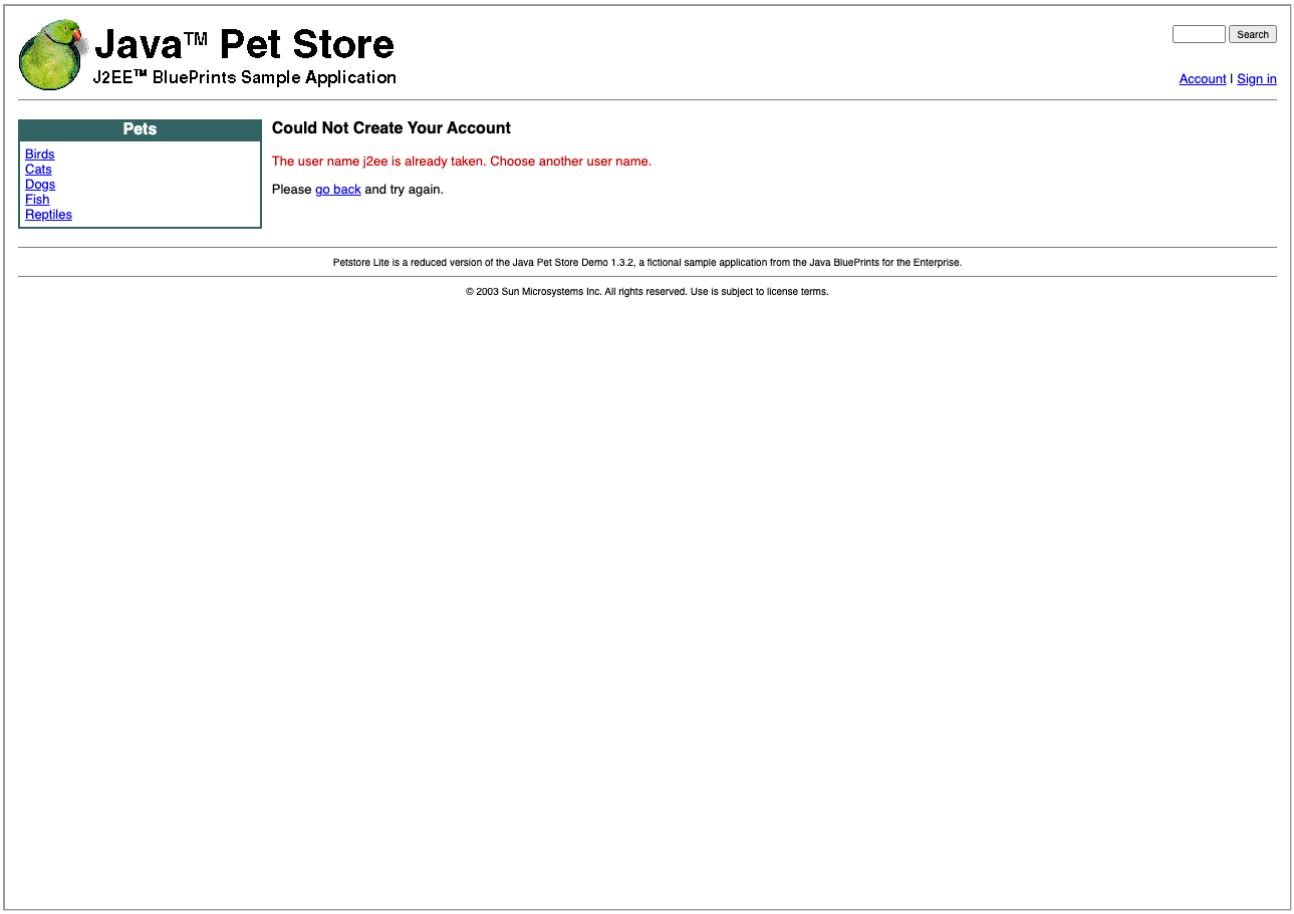

Figure 9. Account creation refused because the user name is taken

5.2 Sign in

1. Click **Sign in**. In the left-hand box *Yes.*, enter your **User Name** and **Password**.
2. Tick **Remember My User Name** if you want the store to fill in your user name next time. The store keeps it in a browser cookie for 31 days. Untick it to forget the name.
3. Click **Sign In**. You return to the page you were trying to open, or to the home page.

If the user name or password is wrong the page *Sign-in Error* appears. Click **try again**.

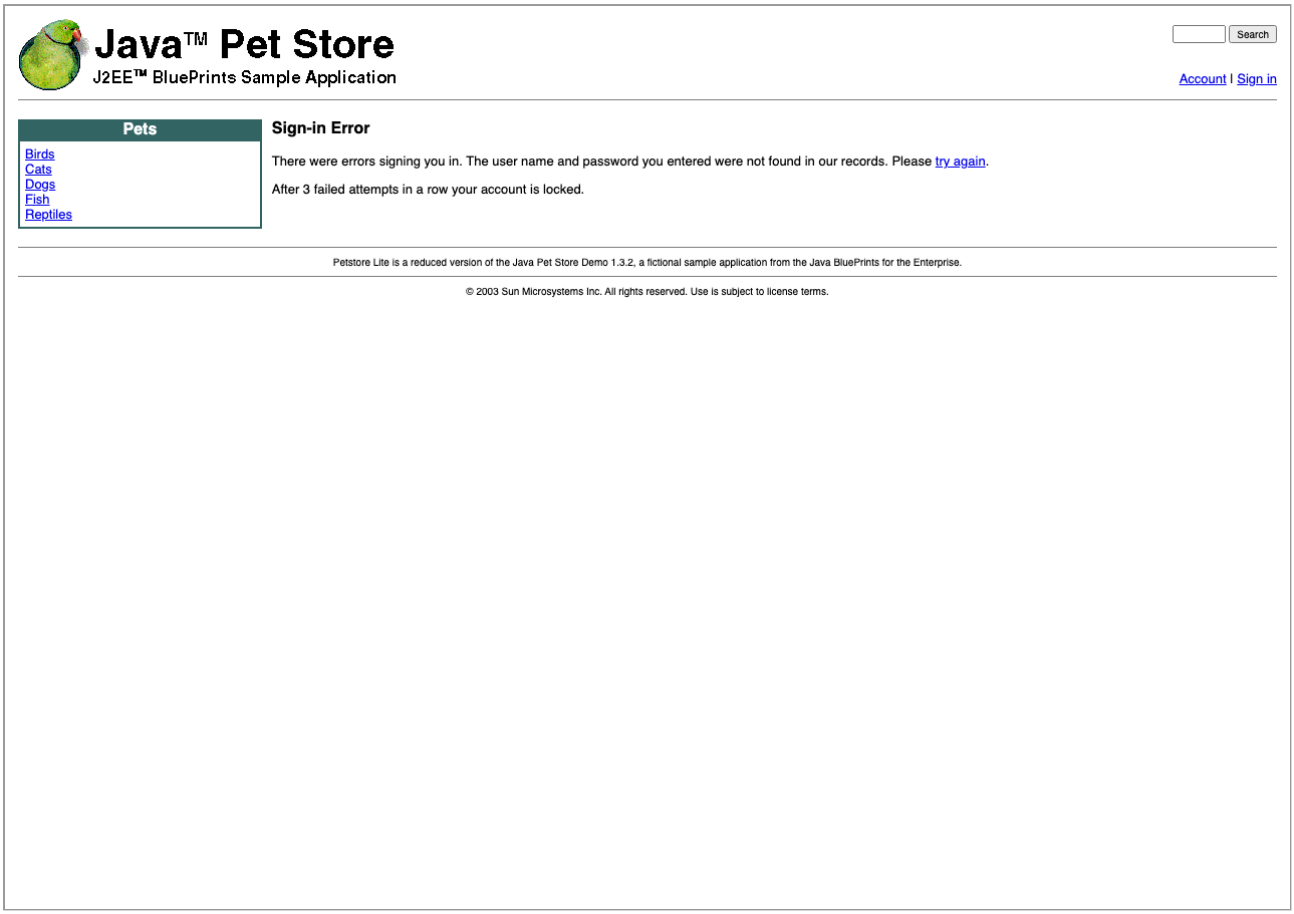

Figure 10. Sign-in Error

5.3 Locked account

> After **3 failed sign-in attempts in a row** your account is locked. While it is locked you cannot sign in, even with the right password.

The page *Account Locked* appears. The lock is cleared automatically 30 minutes after it was set (the store checks every 15 minutes, so allow up to 45 minutes). You can keep browsing the catalog while you wait. A successful sign-in resets the count of failed attempts to zero.

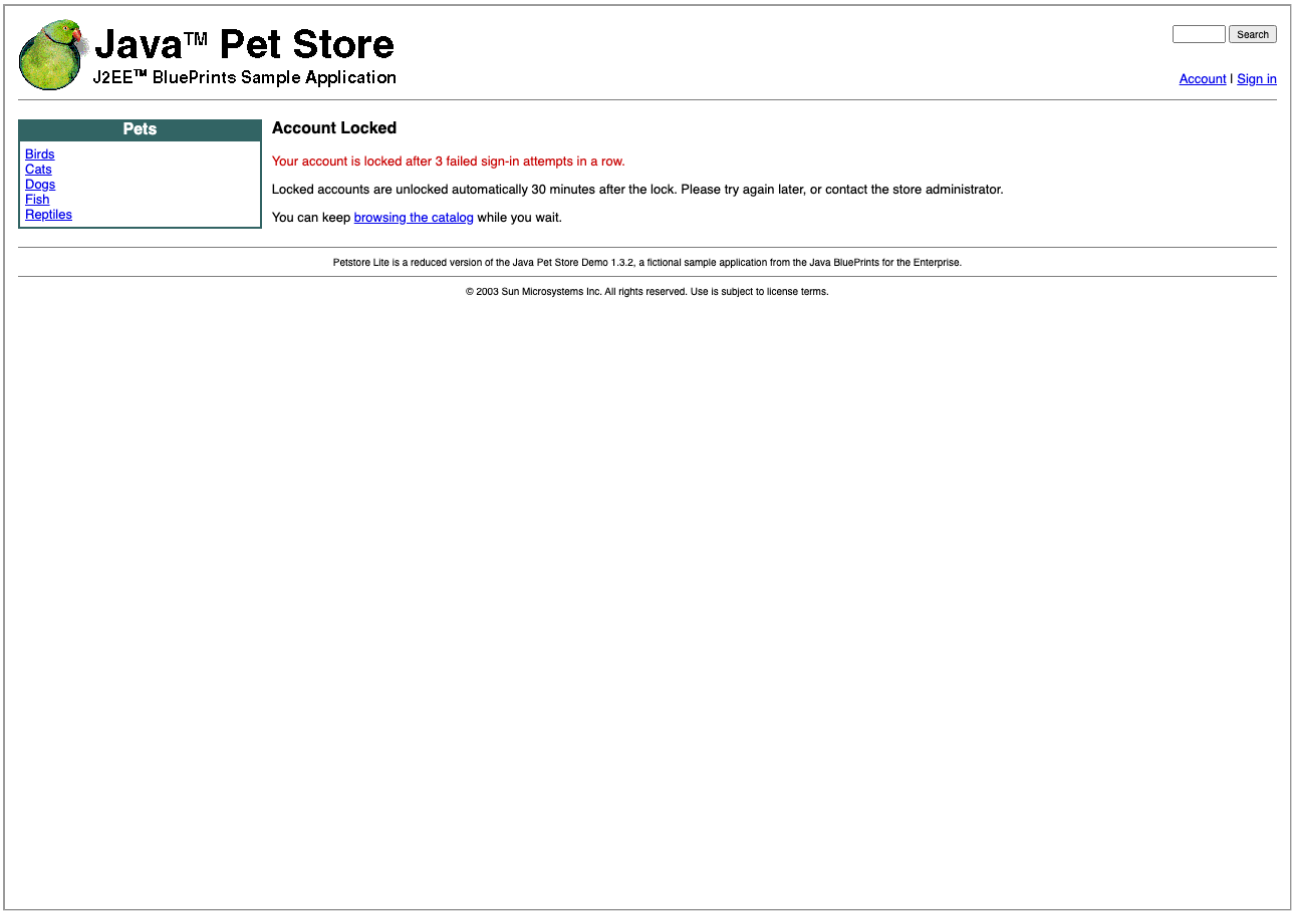

Figure 11. Account Locked

5.4 My Account

Click **Account** in the banner. If you are not signed in, the Sign In page appears first. My Account shows your user name, your role and your 10 most recent sign-in events, newest first.

Event	Meaning
USER_CREATED	The account was created
SIGNON_OK	Successful sign-in
SIGNON_FAIL	Wrong password (or unknown user name)
ACCOUNT_LOCKED	The third failure in a row locked the account
SIGNON_LOCKED	A sign-in was tried while the account was locked
ACCOUNT_UNLOCKED	The lock was cleared by the store
SIGNOFF	You signed out

If you see events you do not recognise, change nothing and contact the store administrator.

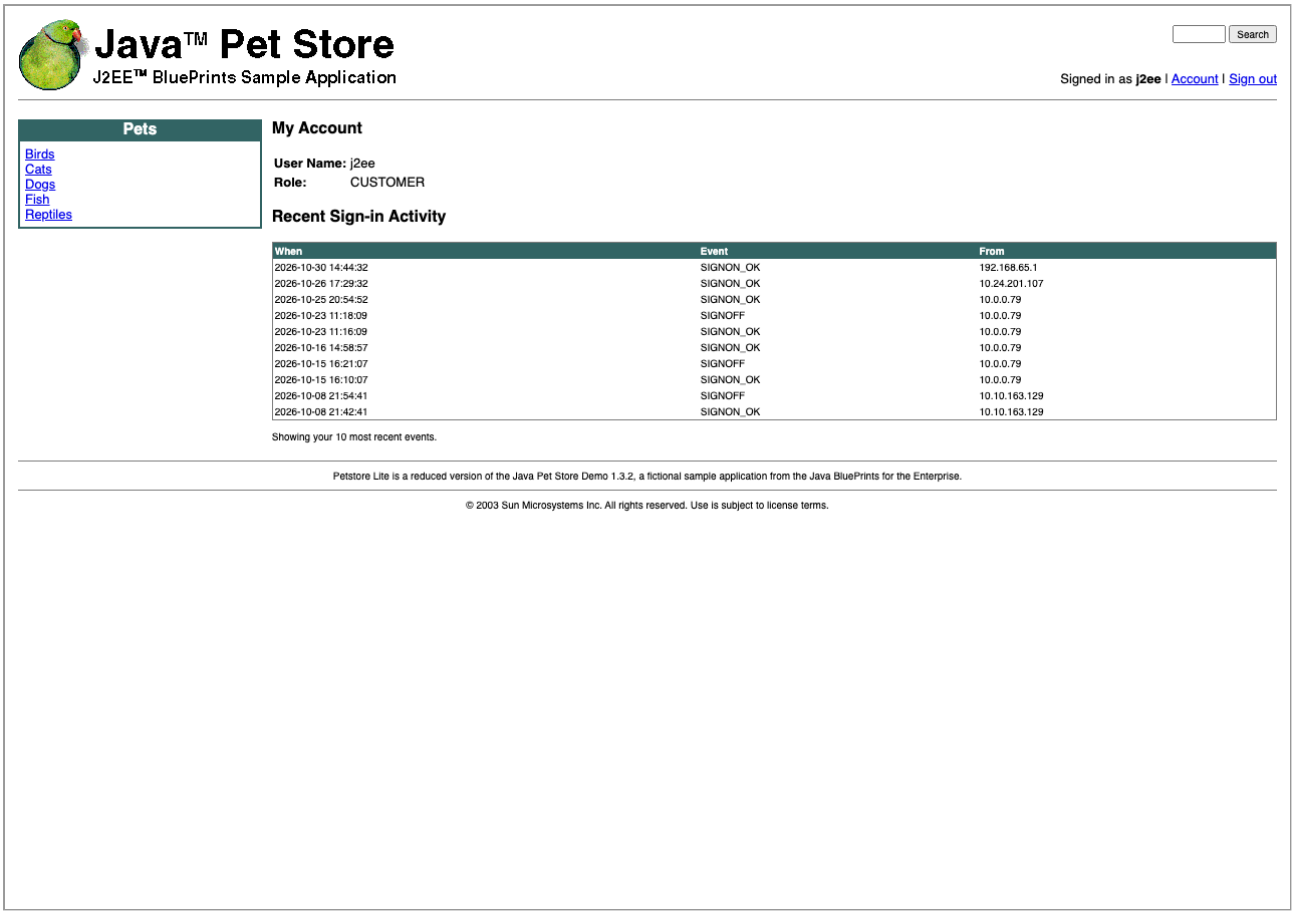

Figure 12. My Account with recent sign-in activity

5.5 Sign out

Click **Sign out** in the banner. The page *You are signed out* appears. If you leave the store without signing out, your session ends after 15 minutes without activity.

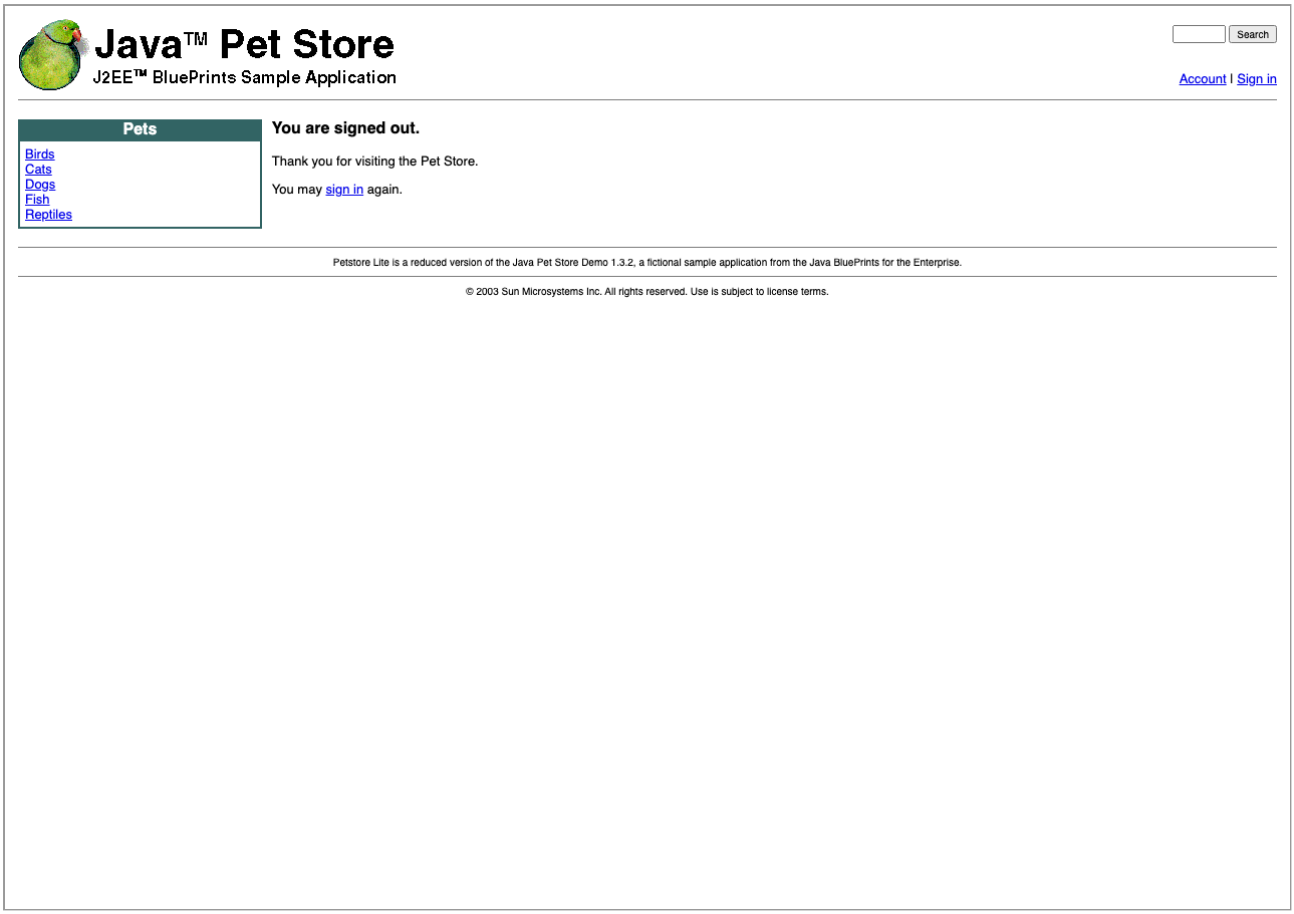

Figure 13. Signed out

6. Messages

Page or message	Cause	What to do
No results were found for your search.	No item matches any of the words	Try a shorter word or a category name
Sign-in Error	Wrong user name or password	Try again. After 3 failures in a row the account locks.
Account Locked	3 failed sign-ins in a row	Wait 30 to 45 minutes, then sign in
Could Not Create Your Account	A field rule in section 5.1 is broken	Correct the field and try again
Access Denied	The page is for administrators only	Return to the catalog
Error	Unexpected problem in the store	Return to the catalog and try again

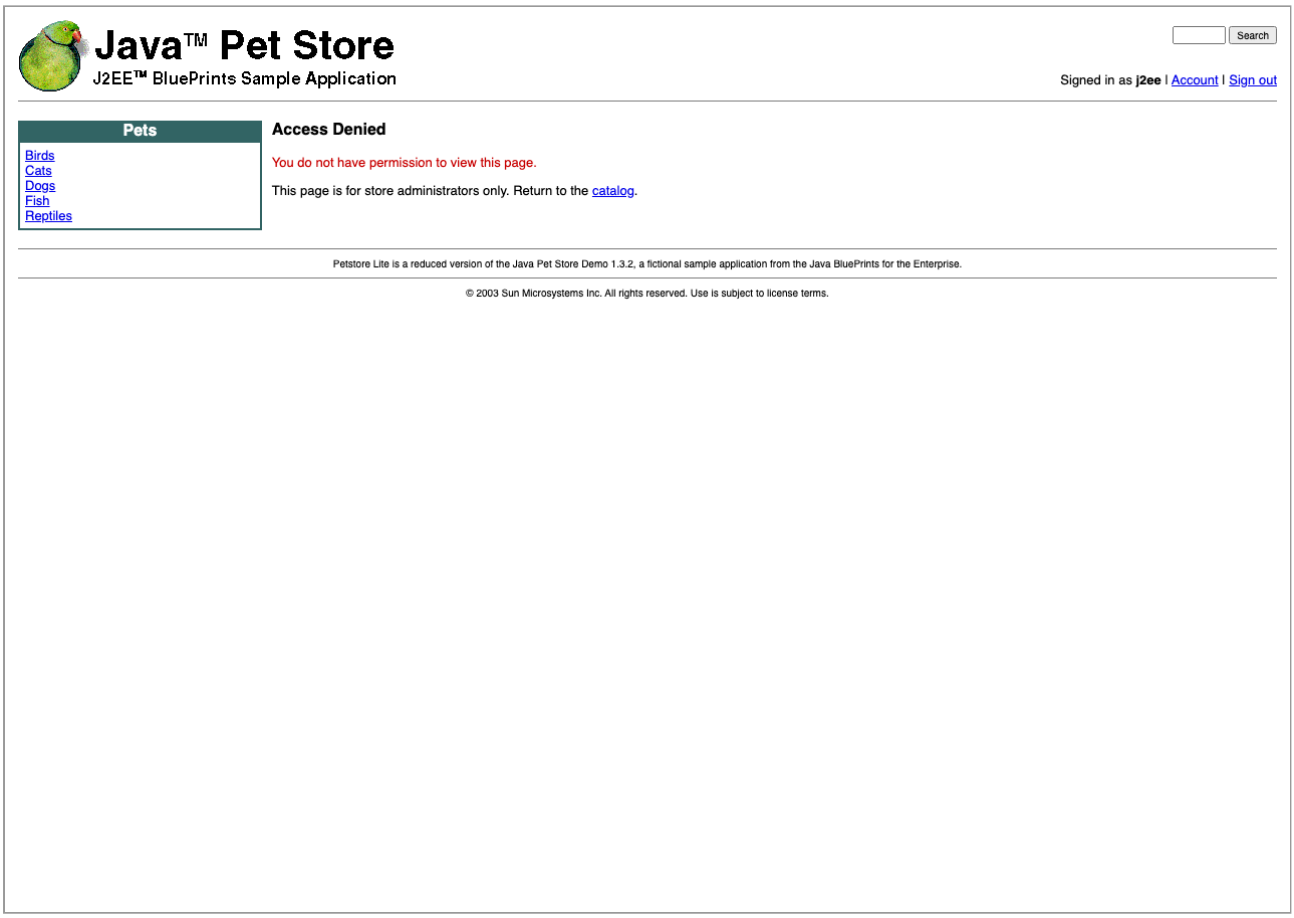

Figure 14. Access Denied
